Subject: RE: Meeting with EPA on February 5th

Hey Brandon,

I apologize for Chris's (from Oasis/ERM) call. The newsletter article is summarizing EPA's involvement based on the letter and PA sent to ACAT. Chris wanted to add something related to EPA's current role but that has not been decided yet. I have communicated that to him.

Thank you for the suggestions on agenda items.

Tamara

Hi Tamara

Here are my ideas for general agenda per our conversation today

Brief Site Background

Update on major issues and milestones since last meeting in August 2012

- 1) Flint Hills refusal to conduct additional off-site characterization and provide alternative water source
- 2) Potential transition of off-site work to Williams, but unsure if Williams will agree to complete work
- 3) FS submittal not adequate and needs to be redone
- 4) Cleanup decision and plan delayed until ???

Options for EPA to address the site and how EPA could help move the site forward.

Also I got a call today from someone at Oasis/ERM, I can't remember his name. He was asking about EPA's decision to not be involved at the site and that we were officially handing over oversight to DEC. He indicated this would be include in an upcoming

newsletter. I let him know EPA has not made a decision on the site. After our conversation it sounded like he was not going to include this in the newsletter, but I wanted to follow up with you to make sure.

Subject: Meeting with EPA on February 5th

Hi Brandon!

I am taking over the Flint Hills site for Ann Farris. We have a meeting scheduled with EPA on February 5th and I was wondering if there are any specific topics that EPA wants to go over. I realize Rick Albright is new to that position and maybe a general background on the project is pertinent but I wanted to see if you had any other thoughts. Let me know if you want to discuss over the phone or if you have some thoughts you can send me.

Thanks! Looking forward to finally meeting you in person :)
